Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 2-4, 6, 7, 8, 13, 14-19 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The claims teach polymer blends, blends of surfactants and organic acids, blends of waxes and organic acids, the chemical binder having a melting point of 120 to 275 degrees F, glutaric acid, disodium, dipotassium or diammonium salts of EDTA, a polymeric form of glycolic acid having a melting point between 120 and 250 degrees F, sodium, ammonium or potassium persulfate, an organic acid having a melting point between 120 and 275 degrees F, and cellulase enzymes (hemicellulase taught), which are not taught in the specification as originally filed. Since this is a divisional application of 09/627145 the addition of the subject matter adds new matter to the claims, and this should be removed. Dependent claims fall herewith.
3. Claims 1, 5, 9-12, are allowable over the art of record.

4. Applicants amendment distinguishes over the applied prior art, which failed to teach the coating specifically applied to the wellbore screen. A further review of applicants claims indicate that such added new matter to the application.
